The last decades of the 19th century were a period of imperial expansion for the United States. The American story took a different course from that of its European rivals, however, because of the U.S. history of struggle against European empires and its unique democratic development.

The sources of American expansionism in the late 19th century were varied. Internationally, the period was one of imperial frenzy, as European powers raced to carve up Africa and competed, along with Japan, for influence and trade in Asia. Many Americans, including influential figures such as Theodore Roosevelt, Henry Cabot Lodge, and Elihu Root, felt that to safeguard its own interests, the United States had to stake out spheres of influence as well. That view was reinforced by a powerful naval lobby, which called for an expanded fleet and network of overseas bases as essential to the economic and political security of the nation. More generally, the doctrine of "manifest destiny," first used to justify America's continental expansion, was now revived to assert that the United States had a right and duty to extend its influence and control in the Western Hemisphere and the Caribbean, as well as across the Pacific.

At the same time, voices of anti-imperialism from diverse coalitions of Northern Democrats and reform-minded Republicans remained loud and constant. As a result, the acquisition of a U.S. empire was neither universal nor ambivalent. Colonial-minded administrations were often more concerned with trade and economic issues than political control.

The United States' first venture beyond its continental borders was the purchase of Alaska -- spruiled by prominent and influential people -- from Russia in 1867. Most Americans were either indifferent to or indignant at this action by Secretary of State William Seward, whose critics called Alaska "Seward's Folly" and "Seward's icebox." But 30 years later, when gold was discovered on Alaska's Klondike River, thousands of Americans headed north, and many of them settled in Alaska permanently. When Alaska became the 49th state in 1959, it replaced Texas as the largest state in the Union.

The Spanish-American War, fought in 1898, marked a turning point in U.S. history. It left the United States exercising control or influence over islands in the Caribbean Sea and the Pacific.

By 1895 Cuba and Puerto Rico were the only remnants of Spain's once vast empire in the New World, and the Philippine Islands comprised the core of Spanish power in the Pacific. The cutouts of imperial sources; population pressure; and competition to autocratic Spanish rule in Cuba; U.S. sympathy with the Cuban fight for independence; and a new spirit of national assertiveness, stimulated in part by a nationalistic and sensationalist press.

By 1895 Cuba's growing restiveness had become a guerrilla war of independence. Most Americans were sympathetic with the Cubans, but President Cleveland was determined to preserve neutrality. Three years later, however, during the administration of William McKinley, the U.S. warhost, sent to Havana on a "courtesy visit" designed to remind the Spanish of American concern over the rough handling of the insurrection, blew up in the harbor. More than 250 men were killed. The Maine was probably destroyed by an accidental internal explosion, but most Americans believed the Spanish were responsible. Indignation, intensified by sensationalized press coverage, swept across the country. McKinley tried to preserve the peace, but within a few months, believing delay futile, he recommended armed intervention.

The war with Spain was swift and decisive. During the following year, the United States, which fought 26 battles, captured 13 cities, and drove the Spanish from the Philippines, won its first victory of any importance. A week after the declaration of war, Commodore George Dewey commanded the six-warship Asiatic Squadron at Hong Kong, steamed to the Philippines. Catching the entire Spanish fleet at anchor in Manila Bay, he destroyed it at almost no cost.

Meanwhile, in Cuba, troops landed near Santiago, where, after winning a rapid series of engagements, they fired on the port. Four armored Spanish cruisers steamed out of Santiago Bay to engage the American war vessels and were reduced to ruined hulks.

From Boston to San Francisco, whistles and flags waved when word arrived that Santiago had fallen. Newspapers dispatched correspondents to Cuba and the Philippines, who trumpeted the results of the battles and the war as a whole. Among these correspondents were the young Colonel Roosevelt, who had risen to command of the navy to lead his volunteer regiment, the "Rough Riders," to service in Cuba. Spain soon sued for an end to the war. The peace treaty signed on December 10, 1898, transferred Cuba to the United States for temporary occupation preliminary to the island's independence. In addition, Spain ceded Puerto Rico and Guam in lieu of war indemnity, and the Philippines for a U.S. payment of $20 million.

Officially, U.S. policy was to extend the new territories to provide a favorable environment for U.S. investment (often called dollar diplomacy), to secure the sea lanes leading to the Panama Canal, and even to prevent European countries from forcibly annexing them to their empires. The Philippines gained the right to elect both houses of its legislature in 1916. In 1936 a largely autonomous Philippine Commonwealth was established. In 1946, after World War II, the islands finally attained full independence.

U.S. involvement in the Pacific area was not limited to the Philippines. The year of the Spanish-American War also saw the beginning of a new relationship with the Hawaiian Islands. Earlier contact with Hawaii had been mainly through missionaries and traders. After 1865, however, American investors began to develop the islands' resources -- chiefly sugar cane and pineapple.

When the government of Queen Liliuokalani announced its intention to end foreign influence in 1893, American businessmen joined with influential Hawaiians to depose her. Backed by the American ambassadored, Queen Liliuokalani was arrested and the American flag was raised over the United States' last remaining residual interest in the Pacific. Hawaii was annexed to the United States, leaving Hawaii nominally independent until the Spanish-American War. When, with the backing of President McKinley, Congress ratified an annexation treaty in 1959 Hawaii would become the 50th state.

To some extent, in Hawaii especially, economic interests had a role in American expansion, but to influence policy makers such as Senator Henry Cabot Lodge, and Secretary of State John Hay, the arguments were brilliant. Chief among these were Admiral Alfred Thayer Mahan, who laid out the theory of "sea power"; and Colonel Roosevelt, who had risen to command of the navy to lead his volunteer regiment, the "Rough Riders," to service in Cuba. Spain soon sued for an end to the war. The peace treaty signed on December 10, 1898, transferred Cuba to the United States for temporary occupation preliminary to the island's independence. In addition, Spain ceded Puerto Rico and Guam in lieu of war indemnity, and the Philippines for a U.S. payment of $20 million.

U.S. colonial policy tended toward democratic self-government. As it had done with the Philippines, in 1917 the U.S. Congress granted Puerto Ricans the right to elect all of their legislators. The same year also had the island officially a U.S. territory and gave its people American citizenship. In 1950 Congress granted Puerto Rico complete freedom to decide its future. In 1952, the citizens voted to reject either statehood or total independence, and chose instead a commonwealth status that has endured despite the efforts of a vocal separatist movement. Large numbers of Puerto Ricans have settled on the mainland, to which they have free access and where they enjoy all the political and civil rights of any other citizen of the United States.

The canal and the Americas

The war with Spain revived U.S. interest in building a canal across the isthmus of Panama, uniting the two great oceans. The usefulness of such a canal for sea trade had long been recognized by the major commercial nations of the world; the French had been digging one in the late 19th century but had been unable to overcome the engineering difficulties. Having become a power in both the Caribbean Sea and the Pacific Ocean, the United States saw a canal as both economically beneficial and a way of providing speedier transfer of warships from one ocean to the other. At the turn of the century, what is now Panama was the rebellious northern province of Colombia. When the Colombian legislature in 1903 refused to ratify a treaty giving the United States the right to build and manage a canal, a group of prominent Panamanians, with the support of the U.S. Marines, rose to power and declared Panama independent. In 1903, the United States and Panama signed a treaty in which the United States agreed to purchase a strip of land (the Panama Canal Zone) between the Atlantic and the Pacific, in return for $10 million and a yearly fee of $250,000. Colombia later received $25 million as partial compensation. Seventy-five years later, Panama and the United States negotiated a new treaty. It provided for Panamanian sovereignty in the Canal Zone and transfer of the canal to Panama on December 31, 1999.

The completion of the Panama Canal in 1914, directed by Colonel George W. Goethals, was a major triumph of engineering. The simultaneous conquest of malaria and yellow fever made possible and was one of the 20th century's great feats in preventive medicine.

Elsewhere in Latin America, the United States fell into a pattern of flirtation intervention. Between 1900 and 1930, the United States carried out sustained interventions in six Western Hemisphere nations -- most notably Haiti, the Dominican Republic, and Nicaragua. Washington offered a variety of justifications for these interventions: to establish political stability and democratic government, to provide a favorable environment for U.S. investment (often called dollar diplomacy), to secure the sea lanes leading to the Panama Canal, and even to prevent European countries from forcibly taking control of key cities.

In late 1967, the United States had pressured the French into removing troops from Mexico in 1867. Half a century later, however, as part of an ill-starred campaign to influence the Mexican revolution and push rebels out of the territory, President Woodrow Wilson sent 11,000 troops into the northern part of the country in a futile effort to capture the elusive rebel and outlaw Francisco "Pancho" Villa.

Exercising its role as the most powerful state -- and also as the richest state since the Confederate States of America was defeated -- the United States had mounted an extensive effort to bring its interests and influence to bear on neighboring countries, especially in the Caribbean. It used economic, political, and military overtures to exert influence over neighboring countries, especially in the Caribbean. It used economic, political, and military overtures to exert influence over neighboring countries, especially in the Caribbean.

In September 1969, Secretary of State John Hay advocated an "Open Door" for all nations in China -- that is, a policy of open trading opportunities (including equal tariffs, harbor duties, and railway rates) in the areas controlled by the empire.

The later administrations of Herbert Hoover (1929-33) and Franklin D. Roosevelt (1933-45) repudiated the open door policy in Latin America. In particular, Roosevelt's Good Neighbor Policy of the 1930s, while not ending all tensions between the United States and Latin America, helped dissipate much of the ill-will engendered by earlier U.S. intervention and unilateral actions.

The United States and Asia

Newly established in the Philippines and firmly entrenched in Hawaii at the turn of the century, the United States had high hopes for a vigorous trade with China. However, Japan, and various regional European powers had acquired substantial spheres of influence there in the form of naval bases, leased territories, monopolistic trade rights, and exclusive concessions for investing in railway construction and mining.

Idealism in American foreign policy existed alongside the desire to compete with Europe's imperial powers in the Far East. The U.S. government thus insisted as a matter of principle upon equality of treatment and commerce in the areas Europeans controlled. Despite its idealistic component, the Open Door, in essence, was a diplomatic maneuver that sought the advantages of colonialism while avoiding the stigma of its own practice. It had limited success.

With the Boxer Rebellion of 1900, the Chinese struck out against foreigners. In June, insurgents seized Beijing and attacked the foreign legations there. Hay promptly announced to the European powers and Japan that the United States would oppose any disturbance of Chinese territorial or administrative rights and restated the Open Door policy. Once the rebellion was quelled, Hay

Expansion and Empire, 1867–1914 [1]

The United States and Asia
protected China from crushing indemnities. Primarily for the sake of American good will, Great Britain, Germany, and lesser colonial powers formally affirmed the Open Door policy and Chinese independence. In practice, they consolidated their privileged positions in the country.

A few years later, President Theodore Roosevelt mediated the deadlocked Russo-Japanese War of 1904-05, in many respects a struggle for power and influence in the northern Chinese province of Manchuria. Roosevelt hoped the settlement would provide open-door opportunities for American business, but the former enemies and other imperial powers succeeded in shutting the Americans out. Here as elsewhere, the United States was unwilling to deploy military force in the service of economic imperialism. The president could at least content himself with the award of the Nobel Peace Prize (1906). Despite gains for Japan, moreover, U.S. relations with the proud and newly assertive island nation would be intermittently difficult through the early decades of the 20th century.

People:
Queen Liliuokalani of Hawaii gave up her throne to prevent bloodshed when sugar planters and American businessmen threatened to depose her.

Places:
By 1910, a handful of colonial powers had carved up most of the world. This map shows each country's holdings.

Watch and Listen:
The fifty-mile Panama Canal, shown here under construction in 1913, shortened travel from the Atlantic to the Pacific by weeks and realized a centuries-old dream of convenient sea travel from Europe to Asia. It was the most expensive construction project in U.S. history to that time, and more than 5,000 lives were lost to disease and accidents.

Artifacts:
This cartoon in the Chicago Tribune portrayed Cuba, Puerto Rico, and the Philippines as dirty children knocking on Uncle Sam's door.

This map of "Greater America" in 1899, shows the expanded territories and possessions of the United States after the Spanish-American War.
