

## Mountain forest vegetation

### Mountain forest vegetation

Blue sky with streaks of white clouds at the top foregrounded by trees along the slope of a mountain. There are a few rhododendron trees seen at the left corner of the photo. Rhododendrons are common shrubs in the warm-climate gardens of North America and Australia. The larger tree varieties, such as those seen here, are forest dwellers growing at altitudes of between 2,500 and 3,000 meters or more.
