Dorothy Auman at Seagrove Pottery, April 18, 2005. From the NC ECHO Project, North Carolina Department of Culture Resources on NC Digital Collections.

^[4]Excerpt from Session Law 2013-189, House

Bill 830:

Whereas, North Carolina's clay rich soil has contributed to the State's pottery heritage; and
Whereas, the use of clay has grown from the State's early Native Americans making mostly utilitarian wares and European settlers continuing the traditions of their ancestors to today's potters designing pottery with utilitarian and aesthetic elements; and

Whereas, the pottery tradition continues to thrive in North Carolina, especially in the Seagrove area, which includes parts of Chatham, Lee, Moore, Montgomery, and Randolph Counties; and

Whereas, clay continues to be an important art medium contributing to the State's cultural, social, and economic prosperity;

Clay is adopted as the official art medium of the State of North Carolina.

§ 145-46. State art medium designated.

Clay is adopted as the official art medium of the State of North Carolina.

North Carolina clay has inspired artistic expression in craft, music and literature. It provided the name for the [Red Clay Ramblers](#) ^[5], the American folk string band, and the imprimatur of the [Red Clay Reader](#) ^[6], 1964-1970 publisher of North Carolina poets and writers.

The composition of clay affects the way it can be worked, leading to unique forms and techniques specific to each community.

'Red clay' evokes the Piedmont soil from Triassic sediments in Lee and Moore counties. The red clay potters in the [Seagrove area](#) ^[7] still dig the clay out of the ground, the redder iron-laced clay from beneath the topsoil and the grey clay used in stoneware from creek beds.

The mountains produce [kaolin](#) ^[8] from feldspar and mica deposits. This soft white clay is essential to porcelain and ceramic pottery.

The [pottery tradition](#) ^[9] in North Carolina has evolved from utilitarian functionality to collectible art. Many art potters are

associated with the [Penland School of Crafts](#) [10], which offers workshops in clay and studio space to resident artists. In its two-story clay studio, wheel-throwing, handbuilding and sculpting techniques are taught and evolved. The [John C. Campbell Folk School](#) [11] also offers a wide range of classes in clay from beginner to perfecting glazes to building kilns. The Mint Museum of Craft+Design Education Resource Center documents the techniques of coil building, press molding, slab building and wheel throwing.

Many craft festivals and studio tours feature contemporary pottery, including the [Seagrove Pottery Festival](#) [12] and the [Appalachian Potters Market](#) [13].
