Tips for searching the North Carolina Gazetteer

<u>Return to *The North Carolina Gazetteer* main page.</u> [2]

If you search for a term with an apostrophe or hyphen and get no results, try your search without those punctuation marks.

Example: search for *Toms Creek* instead of *Tom's Creek*

Many towns, geographic features, and other places in North Carolina have the same name. The *Gazetteer* lists them in alphabetical order by county.

This will only search place names. Extra words that may be included in the description will not help you find the correct entry.
