The General Assembly of 2005 adopted the Fraser Fir as the official Christmas Tree for the State of North Carolina ([Session Laws, 2005, c. 387](#) <sup>[5]</sup>).

### **Selection as State Christmas Tree**

This law is the result of the hard work of Eighth Grade students at Harris Middle School in Spruce Pine, who researched the economic impact of the Fraser Fir industry on the state, and suggested this species as a new state symbol.

<sup>[6]</sup>**About the Fraser Fir**

The Fraser fir (*Abies fraseri*) derives its name from John Fraser, a Scottish botanist who explored the Appalachian Mountains in the 1700's, and was a collaborator and competitor with Andre Michaux (see [Carolina Lily](#) <sup>[7]</sup>). Fraser firs, which are native to the Appalachian Mountains, can reach a height of 80 feet and may have trunks as large as 18 inches in diameter.

The Fraser Fir can take as long as 12 years to grow to retail Christmas Tree height (6-7 feet), and will be visited by the grower more than 100 times during its life. The Fraser Fir has been chosen a number of times as the White House Christmas Tree, and constitutes a large percentage of Christmas tree production in North Carolina.

### **Update from N.C. Government & Heritage Library staff**

As of 2018, North Carolina grown Fraser fir Christmas trees have been chosen to grace the Blue Room of the White House thirteen times, most recently in 2018. Read more about this event at <https://www.hcpress.com/news/2018-white-house-christmas-tree-selected-in...> <sup>[6]</sup>. To read about other fir trees and families that have represented North Carolina at Christmas in the White House, visit <http://www.ncchristmastrees.com/13-news-and-events/white-house-trees> <sup>[8]</sup>.
