

Museum professionals

| Professional specialty | Responsibility |
|-------------------------------------|---|
| Archaeologist | Locate historic sites to study. Gather artifacts that represent a culture and preserve them for historic purposes. |
| Procurer | Research records of historic artifacts that are part of public or private collections to acquire, through loan or purchase, pieces as a collection for exhibits. |
| Authenticator | Conduct analysis of objects and documents to verify that they were produced in the time and place they are claimed to represent. |
| Exhibit designers | Assemble artifacts and detailed descriptive narrative pieces into quality collections that can be displayed to tell a story. |
| Restoration technicians and artists | Clean, repair, and preserve historical artifacts using scientific methods that protect delicate objects. |
| Curators | Arrange to borrow and display exhibits from public and private collections. Maintain an environment that allows visitors to see and learn with the artifacts while protecting and preserving the artifacts. |
| Archivists | Organize and store historical documents and artifacts to protect and preserve them for future display and research. |
